

Alphabetical Order Worksheet for Class 2 (Free PDF)

What is alphabetical order?

Alphabetical order is a process of arranging words, names, or things in the sequence of letters from A to Z. This is similar to how words are arranged in a dictionary.

Example: Ant comes before Bee. This is because A comes before B.

If the first letter is the same, then the second letters are compared.

Example: Bee and Bug. So, Bee will come before Bug. Here, the second letters are compared.

Exercise

1. Arrange the following words in alphabetical order.
